## Summary

Full-Stack Developer building scalable web applications with React, Next.js, and Node.js. Experienced in REST API design, PostgreSQL and MongoDB, and shipping production-ready apps with clean, maintainable architecture.

## Experience

**Software Engineer & Forward Deployed Engineer** 2026 – Present
*Bug0* *New Delhi, India*

- Build and maintain reliable production software as part of the engineering team.
- Collaborate on product development, implementation, and ongoing technical improvements.

**Full Stack Developer** 2024 – Present
*Freelance* *New Delhi, India*

- Deliver full-stack web applications end to end, from API design through production deployment.
- Design scalable backend systems and REST APIs with Node.js, Express, and PostgreSQL.
- Build polished, accessible frontends with React, Next.js, Tailwind CSS, and shadcn/ui.
- Ship reliable features quickly with clean architecture and maintainable code.

## Projects

**OwnBase** | *TypeScript, React, Electron, Node.js, SQLite, WebRTC* | github.com/Blazeiscoding/OwnBase 2026

- Built open-source team chat you host yourself, on a VPS or straight from the desktop app on your own PC.
- Designed real-time sync on a per-workspace WebSocket event log, with optimistic sends and replay on reconnect.
- Added WebRTC calls with audio, video, and screen share, plus a Slack-compatible API for bots and webhooks.
- Built OIDC single sign-on, signed license keys, and a control plane that hosts many workspaces behind Caddy.

**Better-learn** | *Next.js, TypeScript, Prisma, PostgreSQL, Redis, E2B* | better-learn.tech 2026

- Built a GitHub Classroom alternative: teachers publish assignments from template repos and every student push is graded automatically in an isolated sandbox.
- Integrated a GitHub App for OAuth, push webhooks, and repo provisioning, with results posted as commit checks.
- Built the grading pipeline on BullMQ/Redis with a serverless QStash transport, usage caps, and score parsing.
- Added AI-assisted assignment drafting from a one-line prompt, plus Razorpay billing and invite emails.

**SketchSchema** | *Next.js, AI, Prisma, Drizzle ORM* | sketchema.vercel.app 2026

- AI tool that turns hand-drawn or Excalidraw database diagrams into production-ready Prisma and Drizzle schemas.

**Coding Shastra** | *React, Express, Prisma, PostgreSQL* | codingshastra.nikhilrathore.com 2025

- Educational coding platform with structured lessons, practice tracks, and challenge-based progress.
- Built REST APIs with Express and Prisma on PostgreSQL, with JWT auth and bcrypt password hashing.
- Created an interactive Monaco-based code editor with syntax highlighting and real-time compilation.

## Technical Skills

**Languages**: TypeScript, JavaScript, SQL
**Frontend**: React, Next.js, Astro, Tailwind CSS, shadcn/ui
**Backend**: Node.js, Express.js, RESTful APIs, Prisma, BullMQ
**Data & Tools**: PostgreSQL, MongoDB, Redis, Docker, Git, Vercel

## Education

**University of Delhi** 2021 – 2024
*Bachelor of Science in Computer Science* *New Delhi, India*

**Kendriya Vidyalaya No.3, Delhi Cantt** 2009 – 2021
*Higher Secondary Education* *New Delhi, India*
